 disasterdrs.com/basement-water-damage-restoration

Basement water damage is not only common but also very dangerous. In case of a flooded basement, contacting a water damage restoration company is one of the wisest things you can do. At Disaster Doctors, we are experienced professionals that will effectively perform basement water damage restoration. ***If you ignore the problem or try to do it by yourself, you may end up with more problems such as; electric hazards, growth of mold and mildew, damage to property and damage to building structures.***

Common Causes Of Basement Flooding

- Structural problems such as cracked foundations or floors and poor wall sealing
- Plumbing problems
- Rising levels of groundwater
- Poorly installed drainage systems
- Accumulation of debris in the eavestroughs
- Poorly installed drainage systems
- Poor basement sealing
- Leaking pipes

Signs of Basement Flooding Water Damage

The signs of basement water damage are not always easy to notice. It is important to ***pay attention to signs such as:***

- Growth of mold and mildew
- Too much humidity
- Signs of water damage
- Small puddles of water in the basement
- Musty smells.

If you notice any of these signs, you may need basement water damage cleanup.

If there is a flood in your basement, the ***first thing you need to do is to turn off power sources*** and utilities and then give Disaster Doctors a call. ***Remember that calling us as soon as possible will help reduce damage.***

How To Prevent Basement Flooding

Clean Rain Gutters

Leaves, dirt and dust that fall on your rain gutters may cause them to block. If this happens, ***all water from the roof will go against your foundation*** This may lead to basement flooding. To be safe, clean up your rain gutters as often as you can especially after fall when the leaves have fallen.

Repair Cracks

Cracks on your walls, foundation or floors could result to basement flooding. It is, therefore, advisable to seek the help of a professional if you notice any structural problems.

Inspect Sewers And Gutters

If your sewers and gutters are clogged, your basement may be flooded when there is heavy rainfall. To be safe, ***have your sewers and gutters cleaned and inspected regularly.***

Installing Well Covers For Windows

Your windows could be the cause of flooding in your basement. ***Install good quality well covers*** that reach down to the foundation to be safe. If lighting is an issue, you may use clear covers.

Direct Rainwater Away From Your Home

If rainwater is drained to your foundation, it may lead to flooding. To be safe, ***extend your rain gutter*** so that they direct water as far away from your house foundation as possible.
