Give SLC, Utah water damage professionals at Disaster Doctors a call today at 801-691-7139 today for a free quote!

## Signs Your Water is Leaking from the Refrigerator or Ice Maker

---

A water leak in your refrigerator is instantly noticeable with **dampness or puddling on the bottom shelf**. But a leak caused by a clogged, cracked or frozen defrost drain will overflow the drain, accumulate in the collection compartment and cause **an overflow leak on the floor that may go unnoticed for weeks**. Other issues may include **a water valve leak, leaky fill tube extension or a loose or unsecured water line from the ice maker**. Damage from a slow continual or repetitive leak can wreak havoc on your kitchen floor, surrounding appliances, cupboards, and furniture. Some signs you should watch for include:

- Moisture or Pooling Water on the Bottom Shelf
- Water on the Floor Under or Near the Fridge
- Ice on the Freezer Floor
- Moisture on the Freezer Door

If you suspect a leak coming from your fridge or ice maker, our water damage professionals at **Disaster Doctors** recommend **unplugging the refrigerator from the power supply before attempting any cleanup or maintenance to minimize the possibility of electric shock**. Our knowledgeable and friendly technicians are **on call 24/7** for your refrigerator/ice maker leak cleanup in Salt Lake City, UT.

## Take Immediate Action to Prevent Further Water Damage

---

In order to prevent further water damage, it is important to take preventative measures and contact the professionals at Disaster Doctors in Utah for emergency water damage clean up. Our IICRC trained and certified technicians are licensed, bonded and insured and will work with you to develop a **tailored restoration plan** to target your individual water damage needs. To **minimize the risk of injury or exposure to potentially harmful mildew or toxic mold**, we recommend the following:

- **Unplug the Appliance** to prevent electric shock.
- **Detect the Leak** and turn off the water source.

- **Thoroughly Dry the Area** by mopping up standing water and using fans or a dehumidifier.
- **Document the Damage** for your insurance company.
- **Begin Restoration** by cleaning, disinfecting and repairing or removing damaged materials.
- Or, **Call Disaster Doctors** at 801-754-4134 to ***promptly restore your kitchen to like-new condition*** with innovative disaster restoration techniques.
